

AEROSPACE, DEFENSE & GOVERNMENT MARKETS

CAPITAL MARKETS QUARTERLY

2ND QUARTER REVIEW - 2010

MARKET COMMENTARY

Capital markets activity in the Aerospace, Defense & Government Markets for the 2nd quarter of 2010 revealed that public transactions have been slowing to a near halt, while mergers & acquisitions have been holding steady with 70 to 85 transactions completed over each of the past four quarters.

During the 2nd quarter the capital markets demonstrated a tendency to be to unstable and unpredictable for many companies seeking to either raise capital or go public. The Dow Industrials started strong on April 1 at 10,927, but by the end of Q2 had dropped by 1,153 points closing at 9,774. Due to this instability, many of the companies that have been trying to come to market have held back pending more stable market conditions.

M&A market transactions have shown an increase in transaction value but a decrease in total deals closed. Transaction value increased this quarter mainly due to higher valuations being placed on C⁴ISR companies. C. K. Cooper & Company's IEEE Conference Briefing also revealed that the median multiple for the RF Microwave segment was ~1.1x – 1.2x revenues.

Four of the largest deals done this quarter in this sector included; Boeing's [NYSE:BA] acquisition of Argon ST [NASDAQ:STST] at 2.12x revenues; Harris Corp.'s [NYSE:HRS] acquisition of CapRock at 1.46x revenues, CGI Group's [NYSE:GIB] acquisition of Stanley, Inc. [NYSE:SXE] at 1.24x and Comtech Telecommunication's [NASDAQ:CMTL] bid for CPI International [NASDAQ:CPII] at 1.40x. These four acquisitions accounted for ~\$2.8B, or 37% of the total transaction value for the quarter.

While Prime's and Tier I companies are still acquiring businesses at a premium, other acquirer's continue to favor distressed or bankrupt opportunities. Last quarter, Special Devices, Inc., a private-equity backed specialty manufacturer who was navigating bankruptcy restructuring, sold its Defense & Aerospace division to Ensign-Bickford Aerospace & Defense for \$10.1MM according to court documents. In Q2, PEMCO World Air acquired the assets of bankrupt ExcelTech Aerospace for \$1.2MM with an additional \$400K to be paid if certain conditions were met.

Overall, this quarter was modest for M&A and poor for capital formation activities. Recovery is slow and it is likely to take some time before significant changes start to take place, particularly in the capital markets.
